NO. OF PAGES 13

SUPPLEMENT TO REPORT NO.

THIS DOCUMENT CONTAINS INFORMATION AFFECTING THE NATIONAL DEFENSE OF THE UNITED STATES WITHIN THE MEANING OF ESPIONAGE ACT 50 U. S. C., 31 AND 32, AS AMENDED. ITS TRANSMISSION OR THE REVELATION OF ITS CONTENTS IN ANY MANNER, TO AN UNAUTHORIZED PERSON IS PROHIBITED BY LAW. REPRODUCTION OF THIS FORM IS PROHIBITED.

THIS IS UNEVALUATED INFORMATION

50X1-HUM

CZECHOSLOVAK FIVE-YEAR PLAN PRODUCTION RESULTS FOR JANUARY 1949

In calculating the percentage fulfillment of the plan in individual branches of industry, the number of active persons on a given task was used in weighting. This number, which was supplied by the various Central Managements and the Slovak State Planning and Statistical Office, must still be tested in a number of instances.

It probably will be necessary to recalculate the results for January 1949. The figures in the last column of Table 1 thus will be slightly changed.

In Table 2, under the heading "Production Not Included in the Plan," is shown the production of plants which did not receive a production plan for January 1949. This information includes only those plants which answered questionnaires. The percentage of fulfillment of the plan is calculated from the totals of this information.

The production of the food industry is planned on a quarterly basis; therefore results in that industry will be given every 3 months.

Where data published here differ from those which have appeared previously, the present data are corrections of the previous ones published in this series.

The following is a key to the starred numbers in the tables.

1* In column 2 of Table 2, C is used to denote that the production figures are for the Czech Provinces only; S indicates Slovak figures; and R indicates figures for the entire republic. Where the symbol C-R appears, it indicates that the figures for the Czech Provinces are the same as those for the entire republic, and that, therefore, there is no such production in Slovakia.

2* The 1947 and 1948 figures for gas production are composed of the output of gasworks plus that output of coke ovens which went to other consumers. The 1949 figures cover all gas production.

50X1-HUM

3* The 1947 and 1948 figures for rolled goods include forgings from ingots, which are not included in the figures for 1949.

4* The figures for castings produced in 1949 include those from ordinary metals.

5* A "unit" freight car in the columns for 1947 and 1948 equals one freight car, and in the columns for 1949 it represents 500 hours worked.

6* Passenger automobiles are expressed in units. Trucks and buses are expressed together in 1947 and 1948, while in 1949 each is listed separately.

7* Castings used in installation materials produced in foundries are included under heading of "Castings."

8* Production of phenylquinoline carbonic acid is scheduled to begin in the third quarter of 1949.

9* Bricks, both fired and unfired, are considered to measure 29 by 14 by 6.5 centimeters.

Table 1. Industry in the Five-Year Plan in January 1949
[Preliminary Data]

Industry	Percent Fulfillment of the Plan			
	1947	1948		1949
	Jan	Jan	Dec	Jan
Mining	104.8	100.1	100.4	99.5
Power	100.1	97.3	100.7	102.9
Metallurgy	112.8	108.7	100.9	105.4
